

Java Generics Demo

Overview

The purpose of this project was to develop a basic swap method that utilized Generics.

Constraints

- No frameworks
- Detailed explanations within the code comments

Available Resources

- Provided course material
- Any resource that we could locate/adapt from the internet

Challenges

- Understanding the Generics syntax

Simple Tasks

- Developing the base logic of the program

Order of Accomplishments

1. Research Generics
2. Develop swap method
3. Develop print method
4. Convert both methods into Generics

Resources Used

- Course material
- Stack Overflow

Conclusion

I initially had a hard time understanding what Generics were supposed to look like. The concept made sense, but the implementation took some experimentation.
